THE CREW BEHIND THE FLEET

ABOUT VME

Valley Mechanical & Engineering (VME) is a family-run, 100% Indigenous-owned and operated drill maintenance business based in Western Australia, providing support to drilling and mining operations across Australia. Since 2021, we have built a reputation for delivering reliable, high-quality maintenance, breakdown support, and field service solutions to blast hole, production, and exploration drilling fleets.

With a strong focus on safety, professionalism, and keeping equipment productive, VME works alongside drilling contractors and mining companies nationwide to minimise downtime and keep operations moving. Whether it's scheduled maintenance, emergency breakdowns, labour hire, or technical support, our team is committed to delivering practical solutions and exceptional service wherever our clients need us.

OUR VISION

Our vision is simple: to deliver exceptional labour, maintenance, and equipment support to clients across Australia while adding value to every project we undertake. We adapt our systems to suit our clients' needs—not the other way around.

At VME, we recognise the growing shortage of skilled tradespeople within the mining and drilling industry. We are actively investing in the future workforce through our own apprenticeship and trade upgrade programs. By developing and mentoring the next generation of drill fitters and heavy diesel mechanics, we are helping bring new talent into the industry while maintaining the high standards our clients expect. Maximising productivity, minimising downtime, and building a sustainable skilled workforce for the future is what we strive to do.

THE WAY WE WORK

At VME, we don't just turn up — we turn up properly. Safety, quality, and accountability sit at the front of everything we do, on every site, every callout.

01 SAFETY FIRST — ALWAYS

We comply with all applicable laws, regulations, and mandatory standards across Health, Safety, Environment, and Quality. Where formal standards don't exist, we apply our own internal standards that reflect VME's commitment to consistent, high-quality outcomes.

02 PRIDE OF WORKMANSHIP

We hire fitters who care about their work, and we keep them. Every job is signed off by the person who did it. If our name is on the work, it's on the line.

03 RISK, IDENTIFIED AND CONTROLLED

We proactively identify all risks and eliminate them — or, where that's not possible, mitigate them through documented systems for assessment, control, and monitoring.

04 TRAINED, ACCOUNTABLE TEAMS

Every employee is trained on VME's Safety, Environment, and Quality requirements, with clear accountability assigned to every role. No shortcuts, no excuses.

05 CONTINUOUS IMPROVEMENT

We establish, document, and review measurable objectives — feeding employee insight directly back into how we operate.

INSURANCE

VME holds full coverage including Public Liability and Workers Compensation insurance. Insurance certificates available on request.

WHY CHOOSE VME

- Hand-picked crew — every fitter selected for experience, attitude, and capability
- Specialist focus — drill maintenance is all we do
- Family-run accountability — direct communication, no layers of management
- National coverage
- Honest standards — we tell you what we can and can't do, and we deliver what we say we will
